

# DNM Pre-Amplifier upgrade, for 3D and 3C/3B

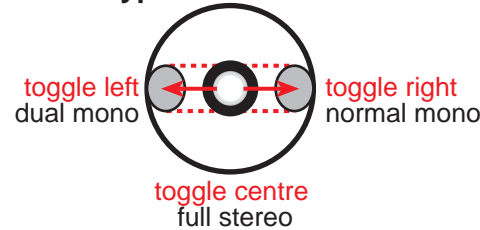

Second generation volume control  
new front panel switch functions

**vertical movement 3 position switch**  
changes volume control rotation  
for a required sound level

**horizontal movement 3 position switch**  
gives two types of mono or full stereo

**Dual Mono**

Both channels fully combined giving identical left/right signal. Both volume controls must be set to exactly the same level.

**Normal Mono**

Both channels well combined allowing left only or right only or both volume controls to be used.
